BYTE CLUB STUDIO

CODING HELP. CLEAR EXPECTATIONS.

Fictional business profile | Ismail Abou Zeid

MISSION & AUDIENCE

Practical coding help for students, beginners, and small organizations. We explain the work, set realistic limits, and help customers become more independent.

SERVICES & PRICES

Python tutoring: USD 25 / 60 minutes, individual guided practice.
Code Clinic: USD 40 / 60 minutes, debugging and code review.
Starter website: free 20-minute consultation; implementation starts at USD 300, subject to written scope and quote.

OUR FICTIONAL TEAM

Lina Haddad - learning lead. Omar Nader - development lead. Maya Saleh - customer operations. These are invented profiles for this fictional business.

WHY BYTE CLUB

Small, clearly scoped help; understandable explanations; English or Arabic sessions; transparent published starting prices and written expectations.

POLICIES & LIMITS

Sessions are online and require confirmed appointments. Rescheduling is free with at least 24 hours' notice. Group tutoring is limited to three learners; group pricing is not published and must be requested. No refund policy, certification, discounts, delivery deadlines, or live availability are published. Code Clinic supports understanding; we do not complete assessed work for submission. Website work covers small informational sites, not payment systems or complex backend applications.

CONTACT & AGENT SCOPE

hello@byteclub.example is a demonstration address. The chatbot can answer from these documents, record an authorized contact request with name/email/needs, and log feedback or unknown questions. Logs are local demonstrations. A receipt does not confirm a booking, an email, a payment, or an external CRM update.
